CAREER OBJECTIVE

Motivated B.Tech Information Technology graduate with a strong foundation in full-stack web development, passionate about building secure, scalable, and user-centric applications. Eager to contribute my development skills and problem-solving ability to a growth-driven organization as a Full Stack or Frontend Developer.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Django, Flask, RESTful APIs, JWT
Databases: PostgreSQL, MySQL, MongoDB, Microsoft SQL Server
Tools: Git, GitHub, VS Code, Figma, Postman, Socket.io

INTERNSHIP EXPERIENCE

Full Stack Web Developer Intern — L&T Construction

Feb 2026 – May 2026

- Developed and deployed full-stack enterprise modules using React.js, Django REST Framework, Python, and Microsoft SQL Server, implementing Role-Based Access Control (RBAC) and Multi-Factor Authentication (MFA) for secure, multi-tier user access management.

Full Stack Intern — OneYes Infotech Solutions & Codsoft

1 Month

- Built and deployed full-stack web applications using HTML, CSS, JavaScript, and MySQL, working on real-time client projects with hands-on exposure across frontend development, backend logic, and database management.

Software Development Intern — Prodigy Infotech

1 Month

- Developed and tested full-stack software applications using industry coding standards, version control with Git worked on real-time industry projects.

PROJECTS

SecureBank – Continuous Biometric Authentication System

github.com/Maheshwari0065/SecureBank-Cont_Auth_system

React.js | Flask | Microsoft SQL Server | One-Class SVM | JWT | MFA/TOTP

- Built a full-stack corporate banking portal with a One-Class SVM model for real-time session anomaly detection using behavioural biometrics, secured with dual MFA (TOTP + email OTP) and JWT token validation.

MediBot – AI-Powered Healthcare Assistance Platform

github.com/Maheshwari0065/Healthcare_chatbot

React 19 | Node.js | PostgreSQL | Socket.io | Google Gemini API | JWT

- Built a full-stack AI-powered healthcare platform integrating Google Gemini API for prescription parsing and symptom screening, with RBAC for patients, doctors, and admins secured via JWT authentication.

Audit Flow - QMS Audit Management System

github.com/Maheshwari0065/Audit_Flow

React.js | Django REST Framework | Microsoft SQL Server | Python | REST APIs

- Developed a full-stack Quality Management System (QMS) portal using React.js, Django, and MS SQL Server to automate audit planning, execution, defect tracking, and PDF report generation. Implemented a 5-modules with RBAC enabled workflow for real-time evidence management, corrective actions, and audit closure tracking.

EDUCATION

Bachelor of Technology in Information Technology

DMI College of Engineering

2022 – 2026 | CGPA: 9.0

Higher Secondary Certificate - HSC

St. Mary's Matriculation Higher Secondary School

2022 | 81.83%

Secondary School Leaving Certificate - SSLC

S R N M Matriculation Higher Secondary School

2020 | 96.4%

CERTIFICATIONS

- Web Development (HTML/CSS/JS) & Python – Udemy
- Frontend Web Development – Reliance Foundation
- CCNA Networking – TekksoL Global
- Python, React, JS, SQL Bootcamp – LetsUpgrade
- Java Training – Campus Connection
- Service Desk Operations – Edubridge
